

Chevron Canada in the Atlantic Region

At Chevron, we are committed to being a good community partner.

We work hard to improve the quality of life for residents in the communities where we live and work, and make investments to help expand local economic development. We align community programs with local needs and government priorities and plans, and wherever possible, partner with local providers. Our goal is to be a partner — and neighbour — of choice.

Economic Development

Stella's Circle

Stella's Circle, an international award-winning organization, that transforms lives through Real Homes, Real Help and Real Work. An innovator, they operate several sustainable social enterprise businesses, providing jobs and training to their clients as well as serving the community at large.

Cultural Partnerships

Symphony Goes to School

Targeted towards Grade 5 and 6 students, Chevron Canada's Symphony Goes to School Program supports the Newfoundland Symphony Orchestra. Through this partnership, the NSO prepares a full set of supplementary educational materials for classroom use, which correspond to the concerts in that season's Masterworks Series, to which participating students can subscribe at no charge.

Health Partnerships

Food First Newfoundland

Chevron Canada supports Food First Newfoundland's, "Community Led Food Assessment Initiative" as well as the "Social Innovation Kickstarter Grant", both of which are aimed at addressing the systemic issue of food scarcity in the community.

Education Partnerships

Chevron Open Minds

Chevron Canada's flagship program, Chevron Open Minds, is an award-winning learning program that provides a hands-on, out-of-classroom experience for students, focusing on observation, writing and critical-thinking skills. Chevron's partnership with The Rooms allows teachers to provide their classrooms with a unique, tailored learning experience that is curriculum-based and transformative.

Let's Talk Science

Chevron Canada's partnership with Let's Talk Science is focused on building awareness of STEM-related career opportunities with junior high and high school students. CurioCity, one of a number of Let's Talk Science programs that Chevron Canada supports, provides a free, web-based program filled with career content and exciting STEM resources.
